- Completed conversion of network visualization data reduction script developed in Perl to Java.

INFANTRYMAN SQUAD LEADER

U.S. Army

Feb 2010 – May 2017

- Held a Secret clearance for entirety of career.
- Trained teams on emergency situation preparedness, tactical planning, equipment maintenance and weapon use.
- Maintained accountability of \$100,000 worth of equipment and sensitive items for an 8-man team resulting in zero loss over the course of career.
- Assisted in implementing new security standard operating procedures that led to increased protection for the area of operation.

PROJECT EXPERIENCE

- **Online Resume** (Fall 2022) Created an online 'about me' resume. Created using HTML, CSS and JavaScript.
<https://mjm-test-site.bitbucket.io/index.html>
- **Roll 'Em If You Got 'Em** (Spring 2022). Created an online dice rolling app where users can create an account, store their dice roll history, and implement general add and subtract functionality. Created using Eclipse, Heroku, Model View Controller formatting, Junit, PostgreSQL and Docker.
<https://bitbucket.org/marco986/roll-em-if-you-got-em/src/master/>
- **SQL Project** (Fall 2021). Created and generated a database imitating real life scenarios of tracking college students in order to support the needs of faculty members. Create/populate scripts and queries following the rubric of the project. LucidChart, SSMS, Microsoft Azure, Microsoft PowerPoint.
